

Abstract of Disclosure (currently amended)

Gyroscopes-Stabilized Free-Standing Towers and missile defense systems that support and provide surveillance radar, communication systems, defense systems and electric power to defend against cruise missiles, ICBMs, manned and unmanned aircraft. The towers and their defense systems thus provide the lowest cost option for positioning systems where look-down surveillance, look-over-the-natural-horizon surveillance, look-up surveillance and high electric power requirements are a major consideration.

Abstract of Disclosure (original): Free Standing Towers, and defensive systems that support and provide surveillance radar, communication systems and defense systems against cruise missiles, ICBMs, manned and unmanned aircraft by providing the lowest cost option for positioning systems where look-down surveillance, look-over -the-natural horizon surveillance, look-up surveillance and high electric power requirements are a major consideration.
